Subject Index

Acetylenes
measurement of absolute rate data for the reactions of ground state atomic silicon Si($3\,^3P_J$) with acetylenes by time-resolved atomic resonance absorption spectroscopy, 1
N-Acetyl-1-pyrenylalanine methyl ester
chiral discrimination in the intermolecular excimer formation of *N*-acetyl-1-pyrenylalanine methyl ester in chiral solvents, 133
Alkanes
mechanisms of S_1 decay in alkanes: deuterium effect, 241
Alkyl chlorides
collisional deactivation of vibrationally hot ethylene produced by the photoactivation of ethyl bromide at 121.6 nm, 39
determination of absolute rate data for the reactions of atomic potassium, K($4\,^2S_{1/2}$), with CH_3Cl, C_2H_5Cl, $(CH_3)_2CHCl$, $C_2H_5CHClCH_3$ and $(CH_3)_3CCl$ as a function of temperature by time-resolved atomic resonance absorption spectroscopy, 13
Alkylperoxy radicals
measurements of the gas phase UV absorption spectrum of $C_2H_5O_2^{\bullet}$ radicals and of the temperature dependence of the rate constant for their self-reaction, 173
Aminobenzoate
the effect of solvent relaxation processes on the fluorescence spectra of *ortho*-aminobenzoate anesthetics, 261
Anesthetics
the effect of solvent relaxation processes on the fluorescence spectra of *ortho*-aminobenzoate anesthetics, 261
Anthracenes
energy transfer from 2-ethylnaphthalene and naphthalene to 9,10-diphenylanthracene in low and high concentrations of the donors, 111
temperature effect on inverse intersystem crossing of anthracenes, 283
Atomic resonance
determination of absolute rate data for the reactions of atomic potassium, K($4\,^2S_{1/2}$), with CH_3Cl, C_2H_5Cl, $(CH_3)_2CHCl$, $C_2H_5CHClCH_3$ and $(CH_3)_3CCl$ as a function of temperature by time-resolved atomic resonance absorption spectroscopy, 13
measurement of absolute rate data for the reactions of ground state atomic silicon Si($3\,^3P_J$) with acetylenes by time-resolved atomic resonance absorption spectroscopy, 1
Azobenzenes
photoisomerization of sterically hindered azobenzenes, 321

Benzophenones
electron transfer sensitized photobleaching of rose bengal induced by triplet benzophenones, 269

Cadmium sulphide
solubility and photocorrosion of small CdS particles, 157
Carbaryl
a spectrophotometric and spectrofluorimetric study of the chemical behaviour of the insecticide carbaryl: ground and excited state pK_a values of its metabolite 1-naphthol, 357
Chemiluminescence
high density chemiluminescence studies: explosive decomposition of solid phase tetramethyldioxetane, 73
Chiral discrimination
chiral discrimination in the intermolecular excimer formation of *N*-acetyl-1-pyrenylalanine methyl ester in chiral solvents, 133
Chlorine
convenient photolysis source of $Cl_2(1\,^1\Sigma_u^+)$ and $Cl_2(D'\,^3\Pi_{2g})$ states for kinetic and spectroscopic studies, 27

© Elsevier Sequoia/Printed in The Netherlands

Chlorophyll
the chlorophyll-sensitized photoreduction of nitro compounds in a heterogeneous system, 337
Conformation
photochemistry of 2,5-dimethyl- and 2,5-di-*tert*-butyl-1,3,5-hexatrienes: conformation and reactivity — a quantitative study, 117
Cyanoacetylene,
the UV photochemistry of cyanoacetylene, 63

Deactivation
collisional deactivation of vitrationally hot ethylene produced by the photoactivation of ethyl bromide at 121.6 nm, 39
Decomposition
high density chemiluminescence studies: explosive decomposition of solid phase tetramethyldioxetane, 73
Deuterium
deuterium isotope effects in the photochemistry of 2,5-dimethyl- and 2,5-di-*tert*-butyl-1,3,5-hexatrienes, 313
mechanisms of S_1 decay in alkanes: deuterium effect, 241
Diffusion
kinetics of partly diffusion-controlled reactions XX: fluorescence quenching by the nearest-neighbours model, 233
Dioxetane
high density chemiluminescence studies: explosive decomposition of solid phase tetramethyldioxetane, 73
Dissociation
multiphoton gas phase dissociation of methyl and ethyl formates, 51

Electron transfer
electron transfer sensitized photobleaching of rose bengal induced by triplet benzophenones, 269
Electron spin resonance
electron spin resonance and phosphorescence of quinoline, isoquinoline and their protonated cations in the phosphorescent triplet states, 293
Energy transfer
energy transfer from 2-ethylnaphthalene and naphthalene to 9,10-diphenylanthracene in low and high concentrations of the donors, 111
Ethylene
collisional deactivation of vibrationally hot ethylene produced by the photoactivation of ethyl bromide at 121.6 nm, 39
Excimer
chiral discrimination in the intermolecular excimer formation of *N*-acetyl-1-pyrenylalanine methyl ester in chiral solvents, 133

Filtering
industrial photochemistry XI: comparison between different types of photoreactors and selective filtering for monomolecular photoreactions, 383
Fluid flow
fluid flow in pulsed-laser-irradiated gases: modeling and measurement, 207
Fluorescence decay
fluorescence decay studies using multiplexed time-correlated single-photon counting: application to the aminotetraphenylporphyrins, 223
Fluorescence quenching
kinetics of partly diffusion-controlled reactions XX: Fluorescence quenching by the nearest-neighbours model, 233
Formates
multiphoton gas phase dissociation of methyl and ethyl formates, 51

Hexatrienes
deuterium isotope effects in the photochemistry of 2,5-dimethyl- and 2,5-di-*tert*-butyl-1,3,5-hexatrienes, 313
photochemistry of 2,5-dimethyl- and 2,5-di-*tert*-butyl-1,3,5-hexatrienes: conformation and reactivity — a quantitative study, 117
Hydrogen
reaction of photochemically generated hot hydrogen atoms with but-2-ene and but-1-ene, 197

Hydrogen
reaction of photochemically generated hot hydrogen atoms with but-2-ene and but-1-ene, 197

Iodoform
the photochemical reaction of iodoform with olefins, 127
Insecticide
a spectrophotometric and spectrofluorimetric study of the chemical behaviour of the insecticide carbaryl: ground and excited state pK_a values of its metabolite 1-naphthol, 357
Intersystem crossing
temperature effect on inverse intersystem crossing of anthracenes, 283

Luminescence
luminescence study of uranyl trimethyl acetate dihydrate and Stern–Volmer quenching constants with various substrates in dry and aqueous acetone, 251
Luminescences
radiationless processes of 5,6-diazaphenanthrene in *n*-hexane and hexafluoroisopropanol studied through the triplet and singlet excited luminescences, 301

Naphthalenes
energy transfer from 2-ethylnaphthalene and naphthalene to 9,10-diphenylanthracene in low and high concentrations of the donors, 111
1-Naphthol
a spectrophotometric and spectrofluorimetric study of the chemical behaviour of the insecticide carbaryl: ground and excited state pK_a values of its metabolite 1-naphthol, 357
Nearest-neighbours model
kinetics of partly diffusion-controlled reactions XX: Fluorescence quenching by the nearest-neighbours model, 233
Nitrite
the chemistry of CH_3O during the photolysis of methyl nitrite, 187
Nitro compounds
the chlorophyll-sensitized photoreduction of nitrocompounds in a heterogeneous system, 337
Olefins
collisional deactivation of vibrationally hot ethylene produced by the photoactivation of ethyl bromide at 121.6 nm, 39
reaction of photochemically generated hot hydrogen atoms with but-2-ene and but-1-ene, 197
the photochemical reaction of iodoform with olefins, 127
Organized media
photoisomerization of *all-trans*-retinal in organic solvents and organized media, 329

Palladium
mechanism of photoreduction of water-soluble palladium and zinc porphyrins, 87
Phenanthrenes
radiationless processes of 5,6-diazaphenanthrene in *n*-hexane and hexafluoroisopropanol studied through the triplet and singlet excited luminescences, 301
Phosphorescence
electron spin resonance and phosphorescence of quinoline, isoquinoline and their protonated cations in the phosphorescent triplet states, 293
Photoactivation
collisional deactivation of vibrationally hot ethylene produced by the photoactivation of ethyl bromide at 121.6 nm, 39
Photobleaching
electron transfer sensitized photobleaching of rose bengal induced by triplet benzophenones, 269
Photochromism
photoresponsive peptide and polypeptide systems. V: reversible photochromism of azo aromatic pentapeptide in solvents, 149
Photocorrosion
solubility and photocorrosion of small CdS particles, 157
Photodegradation
photodegradation of surfactants IV: photodegradation of non-ionic surfactants in aqueous titanium dioxide suspensions, 375

Photoisomerization
photoisomerization of *all-trans*-retinal in organic solvents and organized media, 329
photoisomerization of sterically hindered azobenzenes, 321
Photolysis
convenient photolysis source of $Cl_2(1\,^1\Sigma_u^+)$ and $Cl_2(D'\,^3\Pi_{2g})$ states for kinetic and spectroscopic studies, 27
Photoreactors
industrial photochemistry XI: comparison between different types of photoreactors and selective filtering for monomolecular photoreactions, 383
Photoreduction
mechanism of photoreduction of water-soluble palladium and zinc porphyrins, 87
the chlorophyll-sensitized photoreduction of nitro compounds in a heterogeneous system, 337
Photosensitized oxidation
photosensitized oxidation of phytol in seawater, 347
Phytol
photosensitized oxidation of phytol in seawater, 347
Polypeptide systems
photoresponsive peptide and polypeptide systems. V: reversible photochromism of azo aromatic pentapeptide in solvents, 149
Porphyrins
fluorescence decay studies using multiplexed time-correlated single-photon counting: application to the aminotetraphenylporphyrins, 223
mechanism of photoreduction of water-soluble palladium and zinc porphyrins, 87
Potassium
determination of absolute rate data for the reactions of atomic potassium, $K(4\,^2S_{1/2})$, with CH_3Cl, C_2H_5Cl, $(CH_3)_2CHCl$, $C_2H_5CHClCH_3$ and $(CH_3)_3CCl$ as a function of temperature by time-resolved atomic resonance absorption spectroscopy, 13

Quinoline
electron spin resonance and phosphorescence of quinoline, isoquinoline and their protonated cations in the phosphorescent triplet states, 293

Radiationless processes
radiationless processes of 5,6-diazaphenanthrene in *n*-hexane and hexafluoroisopropanol studied through the triplet and singlet excited luminescences, 301
Relaxation
the effect of solvent relaxation processes on the fluorescence spectra of *ortho*-aminobenzoate anesthetics, 261
Retinal
photoisomerization of *all-trans*-retinal in organic solvents and organized media, 329
Rose bengal
electron transfer sensitized photobleaching of rose bengal induced by triplet benzophenones, 269

S_1 decay
mechanisms of S_1 decay in alkanes: deuterium effect, 241
Seawater
photosensitized oxidation of phytol in seawater, 347
Self-reaction
measurements of the gas phase UV absorption spectrum of $C_2H_5O_2^{\cdot}$ radicals and of the temperature dependence of the rate constant for their self-reaction, 173
Silicon
measurement of absolute rate data for the reactions of ground state atomic silicon $Si(3\,^3P_J)$ with acetylenes by time-resolved atomic resonance absorption spectroscopy, 1
Single-photon counting
fluorescence decay studies using multiplexed time-correlated single-photon counting: application to the aminotetraphenylporphyrins, 223
Solubility
solubility and photocorrosion of small CdS particles, 157

Steric hindrance
photoisomerization of sterically hindered azobenzenes, 321
Surfactants
photodegradation of surfactants IV: photodegradation of non-ionic surfactants in aqueous titanium dioxide suspensions, 375
Suspensions
photodegradation of surfactants IV: photodegradation of non-ionic surfactants in aqueous titanium dioxide suspensions, 375

Temperature dependence
measurements of the gas phase UV absorption spectrum of $C_2H_5O_2^{\bullet}$ radicals and of the temperature dependence of the rate constant for their self-reaction, 173
Temperature effect
temperature effect on inverse intersystem crossing of anthracenes, 283
Titanium dioxide
photodegradation of surfactants IV: photodegradation of non-ionic surfactants in aqueous titanium dioxide suspensions, 375

Uranyl trimethyl acetate dihydrate
luminescence study of uranyl trimethyl acetate dihydrate and Stern–Volmer quenching constants with various substrates in dry and aqueous acetone, 251

Zinc
mechanism of photoreduction of water-soluble palladium and zinc porphyrins, 87
